COCOON Folding Arm Awning

The Cocoon Folding Arm awning captivates by its elegant, rounded off design. The low profile of the Cocoon minimizes the impact on the architectural lines of the building.

The completely enclosed construction leaves the fabric protected against dirt, leaves and pollution when not in use.

The angle of inclination can be changed from horizontal to vertical steplessly.

Operation is by crank handle or electric motor with the option of automatic control with sun and wind sensors

Width max 6000mm

Projection max 3500mm

*The cassette height is 138mm
Mounting is face or top fix*
